## Learn beta brawl stars hack apk download

Brawl Stars is a great game, which is more and more popular in the gaming community. Why is this game so interesting and attractive to many people? Do you want to get acquainted with this game quickly? Do you want to be the boss in the battle? Please see the following article to understand more about this game.About Brawl StarsReferring to Brawl Stars, it is an online arena game from the developer Supercell. On June 15, 2017, the game was officially released for the first time. By the end of 2018, the game was widely available around the world.Since its launch in the gaming community, Brawl Stars has received a lot of positive feedback from players. It is attractive because of the beautiful graphics, smooth operation, multiple languages , and constantly updated. Besides, this game brings new features to the arena game genre with simple gameplay. It definitely creates fun for gamers.In the game, your task is to use your Brawl warrior, cooperate with your friends in matches to win trophies and rewards. From there, gamers will be able to unlock Brawl warriors and have enough materials to upgrade them.With Brawl Stars, gamers and their teammates can compete against any 3-player team from around the world. There are 4 game modes for you to choose from, specifically:Bounty: At this level, the player who kills another player will get a star on his head. The team that collects the most stars will win the game.Smash & Grab: In this mode, players will collect Crystals from the center of the map. The team that won 10 Crystals first will win.Heist: This is solo mode.Showdown: In this mode, 10 players fight on a map. The last survivor is the winner.The basic gameplay of Brawl StarsWith Brawl Stars, the gameplay is quite basic. Players just need to be fluent in using the keys and controlling your character to fight and overcome challenges. The operation is not too complicated, in which you just need to control the move - shoot - load - move. Specifically, the scroll key is on the left and the attack key is on the right.Besides, there is a yellow icon near the middle of the screen, which is a special skill. It will enable the character to attack harder with longer range and greater power. As follows:Before entering the game, please name your character.Click Play to start the game.Click OK to agree to the terms of the game.Each match in Brawl Stars will start with a two-team introduction screen.During the game, players and their teammates need to collect pieces of gems. The team that can earn 10 Gems first is the winner. Also, the game shows the number of gems on the left and right bars of the screen.However, each shot will only allow gamers to fire 3 bullets. After that, you need to wait a few seconds for reloading. This game requires a bit of skill and calculation, so you have to pay attention to this issue.The tips for beginnersIf you have played Brawl Stars a lot, you will know the best way to play. But if you are new players, you need a lot of help to play the game well.At first sight, Brawl Stars seems like a cute game but its mechanism is quite complicated. Even if you are a professional player, you may not know all about this game. If you want to play the game better and want to win more matches, please keep in mind the following tips:Always remember that you can hideIn the arena of Brawl Stars, there is a feature that beginners often do not notice, that is hiding. If you choose the right position, you can hide in any map to become invisible to other players. This is not a feature behind a wall because other players will still be able to see you. Hiding means "disappearing" from the eyes of the opponent. If you stand in a bush or the grass, your character will become transparent. So, the enemy will not be able to see you at all.Besides, this feature is valid in all game modes. Hiding will open up a lot of different tactics. If there is a bush near the revive point, you can attack suddenly by hiding there. Also, you can hide if your blood is getting low. If the enemy enters the bush you are standing in, you will be exposed right away. Shooting while hiding will make your position detected. Therefore, you should be careful in these cases.Manual targetingIn the game, there are usually 2 types of attacks, including normal and special attacks. You can shoot automatically or manually for both types. To be able to shoot automatically, you can press the attack button then your character will automatically attack the nearest enemy.This gameplay is easy to use but its efficiency is not high. If you want to aim manually, you can simply press and hold the attack button. This mode is more effective than auto-aim. However, if you choose the auto-aim mode, the game will only attack the nearest enemies without regard to the other factors. Therefore, automatic aiming would not need to know whether the opponent was still full of blood or nearly out of blood.If you choose to shoot manually, you can choose the opponent who is about to run out of blood to kill faster. In case you play on a computer, you can also use the mouse and keyboard to shoot manually or even set up any key to use this feature.Seven gladiators for freeln the game, players have to work hard to get the in-game money to buy things, especially buying gladiators. So, gamers need to know how to save as much money as possible. The game will allow you to get 7 characters for free by reaching certain milestones during the game. They are Nita, Colt, Bull, Jessie, Brock, Dynamike, and Bo. For other characters, you have to use the money to buy.Check out "Halo" In the battle for gems or 3vs3, gamers will be told when the gem will appear. It is important to pay attention to the brightness of the well. After the gem appears, the well will no longer light up. When the pearl is about to appear, it will light up again.If you know how to observe carefully, you will be able to watch the right time to pick up the gem. When the opponents are fighting, you can take advantage to increase your pearl.Not always collect pearlsEven in battle, players should not forget to check the left corner of the screen. If the bar is full but you are still empty, some of your teammates are carrying some big pearls. At this time, you do not need to pay too much attention to collecting gem. Instead, you should focus on protecting your teammates.Players with gems need to move constantly and take advantage of the LOS mechanism. Players who do not carry the gem should continue to attack to keep the opponent away from their teammates. This strategy will work when you can contact other teammates.Save money on large Item BoxesGamers can use gems to buy item boxes in the game. If you only intend to play for free, the number of gems earned will be very small. In other words, you should not waste gems too much for shopping.The in-game store will sell 2 types of item boxes, including big box and super big box. If you have to choose one of them, you should choose a large box because the drop rate of rare items is the same as a super large box. The only difference in the super large box is that you can get more items only.Test your gladiator's ability in a friendly matchIf you are not sure about your gladiator's power during the upgrade, you can refer to their complete upgrade version. Gamers just need to create a friendly match, choose the gladiator you want and play as testing.These friendly matches don't offer rewards, but they do bring another important feature. All gladiators participating in the match will be upgraded to the highest level. In other words, this is a feature for gamers to know the powers of the gladiators at every level. This will help you make the good decision to use the gem to upgrade them.Some common questions about Brawl StarsWhen playing Brawl Stars, you will encounter many concerns about playing the game better. There are some questions that gamers often ask:What is the Showdown event mode?In Showdown mode, gamers can fight alone or choose another player to fight in the Showdown arena. Any player who can defeat all opponents will be the winner. You just need to collect power blocks to increase the damage, increase your health and increase your attack points during the fight.For players, it is often recommended that you should play Showdown event mode when you learn the mechanics of the game. However, before you enter this game, you should practice in Gem Grab or Friendly Games. It will help you familiarize yourself with how to use your characters during the battle.Are there any special events in Brawl Stars?In the game, you can also join in some special events. Some limited events like Showdown will also appear. But they will have additional features, such as receiving damage over time, with healing mushrooms. These healing mushrooms will appear randomly on the map and many more features.Besides, players can make full use of these effects to use their Brawlers most appropriately. For example, you can use throwers or Brawlers to eliminate long-range easily to rank. Also, you do not need to be No. 1 in Showdown, Life Drain, Life Leech events because they are much easier.How does Duo Showdown work?Duo Showdown mode is similar to the Showdown event. However, you will play with your teammates. A total of 5 pairs will participate in the battle. If only one is killed, the other must survive until your teammates revive. If both are killed, they will lose the battle.If you get killed, it means you will lose Power Cubes. So if your teammates cannot get them, the best way is to run to the side of poisonous clouds and get killed. It is important that you find yourself good teammates, using the characters to work well together. From that, you will win more easily. Also, Trophy farm is a great choice, as long as your teammates can play and know how to coordinate well.How to download and install Brawl Stars MOD APK (Gems/Brawlers/Skins) on Android?Currently, you can freely play the game on your phones without worrying about anything.
